SANOFLAC (and its Windows version, NanoRec) is a versatile, high-end audio . It is the fastest and easiest way to tag and name files, organize audio on a computer, and copy it to and from portable media. SANOFLAC is powerful enough to edit multiple audio tracks, yet is easy enough for non-techie users to get their music in their computers, phones, and tablets. Once a file is created in SANOFLAC, you can send it as an email attachment, sync it to iPods, iPhones, and Android phones, and stream it on the Internet. You can make flashcards, eBooks, and podcasts from audio. Adobe Audition . Quickly edit and finish your audio projects with powerful processing and advanced controls. Effects such as EQ, comping, automation, and automation are also available. Use the included audio plug-ins, including a UAD Ultra and several Bass library plug-ins, to give your mixes a polished professional sound. And with its sophisticated waveform editing and monitoring capabilities, you can achieve maximum impact from your mix. Get deep into your mixes with advanced audio effects such as EQ, compression, delays, and modulation. Other features include a sophisticated Phase plug-in, which allows you to . An innovative equalizer feature that allows you to track the same tracks, or swap the EQ between two tracks without affecting the other is also included. Reverb unit is a sample-based reverb plug-in for Serato DJ Pro. Its plug-in interface is simple to navigate, while the effect itself is super-intuitive and surprisingly powerful. The reverb plugin also includes a three-band equalizer and a compressor to work with it. Reverb unit can be used on all audio types, including vocals, instrumentals, mixes, samples, and more. PlaneShift is a high-resolution, sample-based delay plug-in for Serato DJ Pro. The real-time effects are very accurate and powerful. Multiple delay settings, plus all the effects parameters, can be easily managed and set. The delay plug-in also has a compressor to complement it. PlaneShift can be used on any track, including vocals, drums, bass, and more. Disco Stomp also is a free-to-use sample-based delay plug-in for Serato DJ Pro. It works in real-time, so you can set the parameters and 82157476af
